Environmental Liability at Prairie Creek Mine Site

My questions are for the Minister of Lands:

Regarding the Prairie Creek Mine site, could the Minister inform me when the most recent third party assessment of environmental liabilities was made, and:

1. who conducted it?
2. what was the scope of this assessment (that is, what was included in the assessment)?
3. what was the amount of the liabilities estimated to exist?
4. can the Minister table this report?
